Experience

SpectroNOVA

Oct 2023 – Present

Frontend Developer – Typescript, Nuxt, Vue.js, Shadcn/ui, Tailwind CSS

Remote/Mumbai, India

- Developed user-facing features for the Spectro lease management system, improving usability for **over 150 team members** and enhancing overall efficiency
- Crafted intuitive interfaces for complex workflows, leading to a **25% improvement** in user satisfaction scores
- Worked on **multi-tenant architecture**, enabling seamless customization and scalability for diverse client needs
- Established reusable and scalable UI components and design systems with Vue.js & typescript reducing frontend development effort for similar features **by 45%**
- Designed task management and role-based access control features, allowing users to create, assign, and track tasks efficiently while ensuring secure and tailored access to project data and documents
- Developed and maintained interactive project dashboards, helped users to monitor progress, analytics, and key performance indicators in real time, **increased user productivity by 30%**
- **Improved client retention by 15%** by enhancing modular task and document management features.

Constems-AI Systems

Apr 2023 – Sept 2023

Full-stack Developer – Javascript, React.js, Node.js, Express, MongoDB, Redis, Azure storage

Remote/Noida, India

- Created intuitive and responsive UIs, resulting in **30% faster** loading time and improved user experience
- Initiated an email service using Node.js and Express, **boosting operational efficiency by over 50%**
- Enhanced RESTful APIs with large datasets, achieving a **25% improvement** in data retrieval speed
- Engineered backend solutions and built automated scripts to save **10+ hours** of tedious work per week
- Managed and optimized an ATMS web app that monitored and stored data for **around 35,000 vehicles** daily
- Led the creation of a Reporting tool used by an ops team of 8+ members to serve reports to **70+ clients** every week

Technical Skills

Programming Languages: Javascript/Typescript, C/C++, Python

Frontend Frameworks/Libraries: Next.js, React, Vue, Tailwind CSS, Redux, Shadcn/ui

Back-end Tech: Node.js, Express, Prisma, REST APIs, jwt, Websockets

Databases: MySQL, MongoDB, Redis. PostgreSQL

Cloud: Amazon Web Services (AWS), EC2, Docker, Vercel, Azure storage, CI/CD

Other tools: Git, GitHub, Postman, VS Code, JSON, supabase

IT Construct: Data Structures and Algorithms, Object-Oriented Programming, Database Management System

Projects

Portfolio | [Next.js](#), [React.js](#), [Tailwind CSS](#) | [Live](#)

Oct 2022

- Launched a personal web application on the Internet to showcase my skills and projects
- Worked on multiple full stack projects like MoviesSaga, AI-News, Twitter clone etc

Education

Dr. A.P.J. Abdul Kalam Technical University

2019 – 2023

KIET Group Of Institutions, Bachelor of Technology (CGPA - 8.18)

Ghaziabad, Uttar Pradesh

Achievements and Extracurricular

- 5 stars in hackerrank (C++ programming)
- Solved 150+ data structures and algorithm problems
- Participated in different hackathons like Cicada, Bhilai Hacks
